Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

	Application No.	Applicant(s)				
Office Action Occurrence	10/664,273	HERMANN ET AL.				
Office Action Summary	Examiner	Art Unit				
	MELISSA RYCKMAN	3773				
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status						
1) Responsive to communication(s) filed on 14 No.	ovember 2008					
	action is non-final.					
<i>;</i> —	Since this application is in condition for allowance except for formal matters, prosecution as to the merits is					
	closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213.					
Disposition of Claims						
4)⊠ Claim(s) <u>1-49 and 51</u> is/are pending in the application.						
4a) Of the above claim(s) <u>4 and 22</u> is/are withdrawn from consideration.						
5) Claim(s) is/are allowed.						
6)⊠ Claim(s) <u>1-3,5-21,23-51</u> is/are rejected.						
7) Claim(s) is/are objected to.						
8) Claim(s) are subject to restriction and/or	election requirement.					
Application Papers						
9) The specification is objected to by the Examine		- - - - -				
10) The drawing(s) filed on is/are: a) accepted or b) objected to by the Examiner.						
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).						
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).						
11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.						
Priority under 35 U.S.C. § 119						
 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of: 1. Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

This office action is in response to claims filed 11/14/08.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-3, 15-19, 30-33, 48, 49 and 51 are rejected under 35 U.S.C. 103(a) as being unpatentable over Buelna et al. (U.S. Patent No. 6,719,766) and further in view of Pierce (U.S. Patent No. 5,893,878).

Claims 1,19,48,49:

Buelna teaches an insert for attachment to a jaw-type surgical instrument adapted for grasping or occluding a vessel, said insert comprising an elongate member having opposed proximal and distal ends, a compliant cushion (26) having a tissue-engaging contact surface, said insert further comprising a back surface opposite to said contact surface, and a jaw attachment (22) member on the back surface, wherein said contact surface and said back surface extend between said opposed proximal and distal ends and face opposite directions.

Buelna teaches the claimed invention but does not specify hooked elements, however Pierce teaches and having a plurality of molded, hooked traction elements on at least a region of said surface, where the hooked traction elements are configured to

have at least two crooks (24 and 80, Fig. 13), wherein said hooked traction elements are of unitary construction with said tissue engaging contact surface. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have hooked elements as this aids in securely holding tissue.

Claims 15-18 and 30-33:

Since the device of Buelna teaches all structural limitations as set forth by the independent claims, it is inherent that the device is capable of performing the function required by the claims, that being providing traction forces of either 6-8 pounds or 1.5-2 pounds.

Claim 51:

Buelna teaches said insert comprises an overmold (24) having first and second sides, said compliant cushion is fixed to said first side and said jaw attachment member is fixed to said second side (Fig. 7A)

Claims 5-7, 23-25 and 42-47, are rejected under 35 U.S.C. 103(a) as being unpatentable over Buelna et al. (U.S. Patent No. 6,719,766) and Pierce (U.S. Patent No. 5,893,878) as applied to claims 1 and 19 above, and further in view of Bramstedt (U.S. Patent No. 2,706,987).

Pierce and Buelna teache the claimed invention, Pierce teaches an insert (44) for attachment to a jaw-type surgical instrument (Fig. 1) adapted for grasping or occluding a vessel, said insert comprising a compliant cushion (22) having a tissue-engaging

contact surface (24) and having a plurality of molded, hooked traction elements on at least a region of said surface (fig. 1), wherein said hooked traction elements are of unitary construction with said tissue engaging contact surface (Fig. 13), but is silent regarding the height of the traction elements being no more than about .3mm.

Bramstedt teaches surgical clamp inserts, wherein the traction elements are .004-.008 inches (Bramstedt, col. 1, II. 35) in order to provide lessened or reduced residual witness marks corresponding to less trauma to the clamped vessel.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the device of Pierce and Buelna with traction elements no more than .3 mm in height in order to provide lessened or reduced residual witness marks corresponding to less trauma to the clamped vessel.

Claims 8-14, 26-29 and 34-41 rejected under 35 U.S.C. 103(a) as being unpatentable over Pierce, Buelna and Bramstedt (US 2706987) as applied to claims 5 and 23 above, and further in view of Romanko et al. (US 6484371).

Pierce, Buelna and Bramstedt teach all limitations of preceding dependent claims 5 and 23, and limitations of independent claims 13, 34 and 38 as described with, respect to claims 5 and 23, but fails to teach the density of hooked traction elements on the surface is at least 300/cm2. Regarding the limitation wherein the density of the hooked traction elements on the surface region is at least 300/cm2, Romanko teaches wherein the density of the hooked traction elements may be up to 465 elements per square centimeter or less. It would have been an obvious matter of design choice to

provide Pierce, Buelna and Bramstedt with a traction element density of 300/cm2, since applicant has not disclosed that providing such a density provides any advantage over other densities, and providing a density of 300/cm2 is well known in the art.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
